To Whom It May Concern:

During my employment at Health Strategies Group as Director of one of its syndicated health care research studies, I worked closely with Laura Welch. Laura provided key skills and abilities to the company as an independent consultant.

For a number of years, Laura provided a diverse set of consulting services to Health Strategies Group included developing, implementing and managing a regional health market database. In addition to Laura's impressive database development and quantitative analysis skills, Laura also wrote qualitative regional health assessments, which Health Strategies Group's key clients (pharmaceutical and biotech companies) purchase and depend upon for critical market insights.

In addition to Laura's knowledge of the health care market, databases and quantitative skills, her professionalism, flexibility and work ethic, ensured she was an asset to our company through all she provided to us as a contractor.

I would highly recommend Laura to any company seeking her services. Please feel free to contact me as a reference for Laura at srosen@healthstrategies.com or (301) 299-0572.

Regards,

Shana W. Rosen
